(with and without
overflow)

Internal insulation with
**POLYURETHANE
FOAM**

PRODUCT

Our new and innovative isothermal bins are a solution for the fishing and aquaculture industry, manufactured under strict quality standards. Every industry is constantly seeking processes to improve productivity, efficiency, and cost reduction. Our isothermal bins are used for transporting fish, shrimp, etc., providing a constant temperature for longer periods of time.

ADVANTAGE

- **Reinforced side structure** provides greater resistance to weight and impact.
- **Reinforced thermal insulation** ensures longer cold retention inside the BIN.
- **Reduces** transportation costs, eliminating the need for thermally insulated vans or refrigeration equipment.
- **Ensures** product quality during long shipments by maintaining the cold chain.
- **Facilitates** transport with forklifts and manual loaders, thanks to its design.

FEATURE

- **700 and 1000 liter** capacities with a measurement scale engraved on the inside.
- Made of certified food-grade polyethylene.
- Double-walled with extra-thick polyurethane foam throughout the body and lid.
- Handles on all four corners.
- Available in a full range of colors upon request.
- Drainage system with a plug (with or without overflow).
- Areas for customization with your logo and BIN marking, adaptable to customer needs.
